INTRODUCTION

when students prepare themselves for competition, it gives a motive and enthusiasm to practice the abacus, which enhances their Abacus skills and is another reason why competitions are conducted. A Competition is conducted to enhance and improve a particular Art or Skill. •when participating in a competition students have an opportunity to expose themselves to a greater competitive zone which boosts their confidence positively if they are guided and made to approach the competition with a sportive mindset. •If they win a prize in the competition, it boosts their confidence and gives a lesson that if practiced and prepared for something, they will get a reward for sure or if they didn't win any prizes despite their preparation, they can learn a lesson that participating is an experience in life, rewards are the bonus of that experience. (To cultivate this mindset, Parents and Teachers have to guide them in a way that students enjoy participating and giving their best in competition)
